

teleskopy.pl

Wi-Fi remote control compatible with all GoPro camera models to which the WiFi module is connected or embedded. The remote control allows remote control of GoPro cameras, because the digital screen displays exactly the same as the camera's function screen. With its help, you can control up to 50 cameras simultaneously distant up to 180 meters from the Wi-Fi remote control. The remote control is waterproof to a depth of 10 meters. Works with all GoPro cameras with WiFi, with Hero6 Black included. Elements of the set – belt – charging cable – key ring
