

Adapter for attaching a DSLR camera to the Delta Optical Titanium 65ED II telescope. The adapter is made of light metal alloys and anodized in black, on the one hand it ends with a brass counter ring and on the other it has a M42x0.75 (T2) threaded outlet. Allows simple and secure attaching of the reflex camera body to the telescope eyepiece. It requires the use of a T-ring in order to convert to a certain type of Canon, Nikon, Sony A, Sony Nex, Pentax K or Olympus bayonet type cameras. Warranty 2 years Additional photos:
