

Camrock H051 is a great 3D head made of high quality aluminum-magnesium alloy. Robust performance goes hand in hand with high work comfort. The head has a lock preventing the quick release of the quick connector and the built-in spirit level. Camrock H051 is the successor of the popular Camrock H050. The base with the quick connector has been remodeled in the device. Thanks to this, the ergonomics and functionality of the head have improved. The device allows for quick and precise setting of the camera (or camera) independently in three planes. Works perfectly with Manfrotto, Velbon, Slik, Benro, Gitzo and other tripods. Technical parameters of the head – model: Camrock H051 – quick-release coupling with double locking to prevent accidental release – built-in spirit level – standard thread for mounting on a 3/8" tripod – load capacity: 6 kg – weight: 0.83 kg Warranty 2 years
