Do you know how to combine precise technology with demanding field applications? ACULON W10 binoculars are waterproof and covered with rubber, making them ideally suited for those who lead an active lifestyle. It does not matter if your hobby is trekking or camping, whether you go to outdoor events or stadium concerts, or maybe you are a fan of sports events - these small and light binoculars will work great during any entertainment outside the home. As with the ACULON T01 series, ACULON W10 binoculars are also equipped with multi-layered anti-reflective coatings, 21mm objective lenses, and 8x or 10x magnification for an extremely clear and contrasting image. It is optical equipment at a very affordable price - the ACULON W10 is part of the Nikon range of affordable optical devices designed for active leisure. Characteristics

- light, pocket-sized design makes it very handy
- lenses with multi-layered anti-reflective coatings provide a bright image
- a larger focusing ring allows for smooth focusing
- rotatable-sliding rubber eyecups make it easier to attach the binoculars to the eyes at a distance appropriate for proper vision.
- reliable, comfortable, rubberized grip
- sports construction with one joint
- water resistance (up to 1 m deep for 10 minutes) and anti-fog protection thanks to nitrogen filling

Technical parameters

- magnification: 8x
- Lens diameter: 21 mm
- angled field of view: 6.3 °
- linear field of view at 1000 m: 110 m
- Exit pupil diameter: 2.6 mm
- offset of exit dust: 10.3 mm
- distance between the glasses: 56 - 72 mm
- water resistance: yes
- minimum focusing distance: 3 m
- sharpening system: central dial + tuning in the right eyepiece
- rotating and sliding shells: yes
- optic coatings: multilayer (MC)
- water resistance: yes (o-rings + nitrogen filling)
- dimensions: 87 x 110 x 34 mm
- weight: 215 g

Warranty 10 years
