National Geographic 20x is a constant 20x magnification microscope designed for observation in transmitted and reflected light. An excellent tool for electronics, geologists, jewelers, numismatists and everywhere where we require a small magnification, and the size of objects are large. It is perfect for precise soldering and control of electronic components. Irreplaceable optical device for cellphone services.   
• Maximum working space : 67 mm   
• Maximum height of the subject at which focus can be captured (minimum lens sharpening distance): 32 mm   
Technical data:   
• enlargement: 20x   
• glasses: 10x   
• eyepiece diameter: 23 mm   
• lenses: 2x   
• lighting: LED (LED)   
• power supply: 2x AA 1.5 V (not included)   
Included:   
• mineral samples   
• table with loops for attaching the item   
Warranty 2 years
