The Fotopro RM-100-1 is a small tripod that you like immediately and you will never part with it. Thanks to its small size (26 cm high) it is very mobile, it fits into a bag or backpack. It is made of the highest quality materials, the legs are covered with a pleasant touch of foam in blue. But most importantly, the tripod has a very high usefulness, it can be used as a table stand, allowing eg taking pictures using the trigger, thanks to the flexible legs can be fixed on the branch, tube or in any other unusual place. At the ends of the legs there are rubber heads that ensure stability on smooth surfaces. The tripod is equipped with a ball-head and a quick-connector enabling quick assembly and disassembly of the camera from a tripod. Technical parameters  photo thread: 1/4 inch (standard)  height: 26 cm  length of the leg: 20 cm  lifting capacity: 0.5 kg  quick coupling: YES  rubber feet: YES
