

Good wide-angle spectroscopy eyepiece from Explore Scientific, with a focal length of 25 mm, its own 70 ° field of view, in a 2-inch bezel. The 70 ° apparent field of view (AFOV) eyepiece is 40% larger in the field of view and almost twice as large in the sky compared to typical 50-degree Plossl glasses with the same focal length. Technical parameters ∅ focal length: 25 mm ∅ weight: 333 g (net) ∅ Luminaire diameter: 2 " / 50.8 mm ∅ eyecup: rubber, with the possibility of swiveling
