Dovetail in the L-shaped standard. It has a 3/8 "thread on the base and on the shoulder 1/4 inch thread on a rotating platform, thanks to which you can set the sky of interest in the 360 ° rotation range. What is important, the rotation of the platform is possible with the help of a knob - a small, precise micromovement. In total, it is a very carefully made and very ingenious product. Recommended for the new Star Adventurer assembly and for other mountings with dovetail drive and mounting. Technical parameters ∅ rail width: Vixen standard, keyway, maximum width 43 mm ∅ length of the rail: 15 cm ∅ weight: 475 g ∅ shoulder height: 8.5 cm Warranty 2 years
