

teleskopy.pl

The new Delta Optical Titanium spotting scope was designed for those who do not accept compromises. High transmission of light, for a single layer of 98% and for the entire telescope, 92% put them among the best. A centrally illuminated red dot will help you track down the target even in the conditions of a special lighting. Another characteristic feature of the Delta Optical Titanium spotting scope is high mechanical resistance. Built from a tube with a diameter of 30 mm, they can withstand shots even on weapons with a strong 9.3x62 caliber! Thanks to nitrogen filling, they are also water and fogproof. Confirmation of uncompromising quality is a 10-year warranty. So we give you confidence that the telescope will not let you down. Riflescope intended for weapons with kinetic energy up to 6,500 Joules

Technical parameters

- magnification: 2.5-10x (zoom)
- Lens diameter: 50 mm
- Reticle: German 4A, in the second plan
- backlight: central point, 11-step adjustment
- daylight-night lighting with a large brightness span
- Center point diameter @ 100 m: 11.4 mm @ 10x
- field of view per 100 m: 12.2 m @ 2.5x - 3.3 m @ 10x
- Angular field of view: 7.0 @ 2.5x - 1.9 @ 10x
- cross adjustment (1 click): 1/4 MOA
- total adjustment range: 50 MOA
- the ability to zero the

target drums distance from the eye: 100 - 103 mm Initial exit diameter: 10.56 mm @ 2.5x - 5.2 mm @ 10x Twilight efficiency: 11.18 @ 2.5x - 22.36 @ 10x light transmission of 93% (550 nm wavelength) coatings on lenses: multiple (Fully Multi Coated) water resistance: 0.3 kg / cm² filling gas: Nitrogen body material: aluminum - 70%, brass - 20%, steel - 10% tube: one-piece 30 mm length: 325 mm weight: 604 g shock resistance: 1000G / 6500J functional temperature range: + 71 ° C to -20 ° C Warranty 10 years
