

Dielectric mirror fitting 90 ° 2 " / 2" with a reduction of 1.25 "very good quality, with the accuracy of reflecting surface ? / 12 and efficiency of 99%. Technical parameters : deflection angle: 90 ° : layers: Al + SiO₂ + Ta₂O₅ : high efficiency of the optics at the level of 99% : the mirror has a precision of surface area of : 1/12 lambda : equipped with a 2 " / 1.25" adapter with a copper clamping ring : has a 2 "filter thread : weight: 680 g
