

teleskopy.pl

Nikon Series High Grade Binoculars (HG L) means unparalleled quality, sharpness and clarity of the image, excellent mechanical design and execution, modern materials and the lightness of the construction. Characteristics

- prisms coated with silver coatings with high reflectivity guaranteeing exceptional brightness of the image
- roof prisms covered with coatings correcting phase distortions of light waves ensuring high resolution
- all lenses and prisms coated with multilayer coatings for an extremely clear image
- design with a large distance of good vision ensuring a clear field of view, also for those who wear glasses
- watertightness and resistance to fogging due to sealing rings and nitrogen filling
- diopter adjustment ring locking system that prevents self-tuning of the setting
- rotating and sliding rubber eyecups that make it easier to attach the binoculars to your eyes at the proper distance of good vision
- wide field of view

Technical parameters

- magnification: 10x
- Lens diameter: 42 mm
- angular field of real vision: 6 °
- linear of view at a distance of 1000 m: 105 m
- Excavation: 4.2 mm
- relative brightness: 17.6
- distance of good vision: 19 mm
- minimum focusing distance: 3 m
- distance between the glasses: 56-72 mm
- length: 139 mm
- width: 157 mm
- weight: 790 g

Warranty 10 years
