

EVO stands are made of the highest quality magnesium-aluminum alloys. Precise execution in the forging technology guarantees exceptional durability and reliability of the final product. The Tactic series was created with the thought of professionals and hobbyists photographing in the bosom of nature. Tactic stands are distinguished by the green color and covers of the tripod legs in the masking colors. They are a perfect complement to the equipment for photographing wildlife. High functionality and high quality of workmanship allow you to use tripods in all conditions. The EVO Tactic T60 tripod is designed for use with mirrorless and reflex cameras. Its light weight and dimensions after folding ensure easy transport and storage. Thanks to the use of 5 leg sections, the tripod is characterized by a large working height (166 cm), with a small length after folding (40 cm). In addition, it has the monopod function. The tripod has the option of mounting the head upside down, which is very helpful in taking macro shots. The tripod feet can be converted into spikes (included), allowing for certain positioning, e.g. on ice. The tripod legs move apart after unlocking the screwed, sealed clamps. The regulation of the leg spacing is responsible for solid blocking, there is the possibility of spreading the legs 'flat'. Tactic T60 is equipped with a ball head, 3/8 ", the head has a panorama function with a scale and a blockade. It is additionally equipped with a pressure regulator of the ball lock knob. It is topped with an Arca-Swiss type mounting plate with a standard thread 1 / 4 ". After unscrewing the leg and connecting it to the central speaker, we obtain a fully functional monopod. The hook at the bottom of the column makes it possible to tighten the tripod, increasing its stability. The hook at the bottom of the column makes it possible to tighten the tripod, increasing its stability. Technical parameters

- elements of the set: - EVO ETH60 ball head with a lifting capacity of up to 12 kg, - high quality, practical cover with shoulder strap, - three soft leg pads, - interchangeable leg tips - spikes and feet, - adjustment keys,
- number of sections: 5
- maximum height: 1660 mm
- height of the monopod: 1700 mm
- folded: 400 mm
- weight: 1.7 kg with head
- maximum load: 12 kg
- head: ball
- other: monopod function, replaceable feet, quick-coupler in the Arca-Swiss standard

Warranty 2 years
