Fenix HL10 - this modern torch, thanks to its light weight and compact size, can serve as a traditional headlamp, as well as a handy lighting mounted, for example, on the keys. This solution allows you to have the Fenix HL10 flashlight always with you, in all conditions. Fenix HL10 has a simple system of switching on and selecting modes. The flashlight is switched on by holding the switch on the head of the flashlight for a longer time. The modes are changed by a single short press of the switch. There are three modes available: 70 lumens -> 27 lumens -> 3 lumens. The flashlight has the memory of the last used mode. The maximum working time of the flashlight is 27 hours with 1 x AAA power supply. Fixing, enabling the use of the flashlight as a headlight, was made of plastic, while the anodized aluminum was used to build the body. The Fenix HL10 torch meets the IPX-8 water resistance standard (up to 2 meters immersion without time limit). It is also extremely light - its weight is only 45.2 grams. Technical data model: Fenix HL10 power supply: 1 x AAA (included) maximum lighting power: 70 lumens (according to the ANSI standard) lighting modes: 70 lumens (50 minutes) 27 lumens (2.45 hours) 3 lumens (27 hours) range: 15 meters lenses: ultra clear glass, chemically reinforced, with AR coating body: high quality plastic, aluminum source of light: Cree XP-E LED lifetime of each diode: 50,000 hours dimensions: 69.5 x 29.2 x 28.2 mm weight: 45.2 g without batteries colour Warranty 66 months
