

teleskopy.pl

Metal chair with adjustable seat height (in the range of 29 - 83 cm). Very useful during astronomical observations by a telescope. Anyone who spent the whole night at the telescope knows how useful it is to change the position from standing to sitting. The comfort of observation is also a good chair! parameters â€¢ seat height: adjustable, 29 - 83 cm â€¢ total height: 96 cm (spread out for observation) â€¢ overall height: 107 cm (in transport position) â€¢ weight: 6.2 kg â€¢ lifting capacity (maximum user weight): 120 kg
