

A quick coupler designed for the Camrock TH70 tripod. An additional quick-connector is the ideal product for people using multiple cameras and large lenses that require support on a tripod. It is useful when you do not want to constantly insert the quick connectors between the telescope, the cameras, the lens. Of course, this is an indispensable product for those who lost their quick-disconnect.  $\varnothing$  horizontal dimensions of the mounting foot for the tripod: 39.5 x 39.5 mm  $\varnothing$  the height of the mounting foot for the tripod: 9.3 mm  $\varnothing$  horizontal dimensions on the photographic thread side: 48 x 80 mm  $\varnothing$  also suits Vanguard MAK 203
