G4S is the newest gimbal tycoon on the market of stabilizers - Feiyu. It offers excellent stabilization in three axes, as the first allows the camera to rotate 360 degrees. The news are: the possibility of loading the camera and reading gimbal data from the camera, i.e. without the need to disassemble the camera and a 1/4 inch (photo) thread in the footer at the bottom of the hand (extensions), allowing for attaching the gimbal to, for example, a boom, a monopod or a tripod.

- G4S version - even better stabilization and faster camera installation
- allows you to charge the camera with gimbal
- allows you to read data from the camera without having to disconnect the camera from the gimbal
- intended for GoPro Hero4, 3+ and 3 cameras
- 1-button operation + joystick controlling the position of the gimbal (left - right - up - down)
- stabilization in three axes in the range of 360 °
- optional remote control
- included in the set: gimbal, wires, case, 4 x 900 mAh batteries and a charger
- dimensions: 239 mm x 75 mm x 65 mm
- weight: 265 g
