

ApoBird 15-45x60 is a compact, very well made telescope for bird watching (birding), it works well in observations of nature, and - to a limited extent - in astronomy. Known among hunters, chosen due to the quality of optics and waterproof (filled with nitrogen), rubberized construction. Comes with a cover and a table stand. It can be mounted on any photo tripod with 1/4 inch thread. To connect the camera (SLR, hybrid or compact) we recommend the AFOKAL ADAPTER To connect a SLR camera, we recommend the SLIP ADAPTER / T2 (additionally required ring with T2 on the bayonet of the reflex camera) Technical parameters ⌘ Zoom: smoothly variable, 15-45 times ⌘ Lens diameter: 60 mm ⌘ Optical system: achromatic lens + Amici prisms ⌘ Optical glass: Bak-4 ⌘ Anti-reflective layers: green, FC ⌘ Field of view: 3 ° - 1.7 ° (52 - 30 m / 1000 m) ⌘ Minimum distance of observation: 5 meters ⌘ Outer diameter of the eyepiece: 38.8 mm ⌘ Length: 33 cm ⌘ Outer diameter from the lens side (width): 72.5 mm ⌘ Height (including eyepiece and tripod): 15.5 cm ⌘ Weight: 910 g (weight with tripod and cover: 1420 g) Usage scenery birds planes digiscoping astronomy Additional information: Nitrogen-filled, waterproof, rubber-coated, rugged housing. Including a tripod and a cover. Warranty 2 years FASTENING TO LUNET APOBIRD (2 additional elements needed - T2 ring and Apobird spotting scope on T2 (see above, in the product description)
