

Levenhuk Zeno 900 LED is a compact, portable magnifier without a handle. The lens, 65 mm in diameter, with a high magnification of 5x, makes the device ideal for studying text in small fonts, observing details of photos and images or examining the authenticity of banknotes. The edge of the lens is protected by a metal ring. The magnifier is characterized by a simple and elegant design and unusual convenience of use. You do not have to hold it in your hand - just put a magnifying glass on the surface of the image or card being viewed and move it if necessary. Levenhuk Zeno 900 LED magnifier is equipped with three LEDs. To turn the backlight on or off, simply press the ring of the magnifying glass. The diodes are arranged circularly at equal distances from one another, ensuring uniform illumination of the entire observed area. The intelligent backlight system is automatically controlled - it switches off after 10 minutes. Technical parameters ∅ dimensions (height x diameter): 45 mm x 90 mm ∅ The active diameter of the lens: 65 mm ∅ magnification: 5x ∅ lighting 3 x LED (power supply 2 x CR2016 3 V batteries) ∅ weight: 175 g Warranty lifetime manufacturer's warranty, 2 years shop warranty
