Levenhuk Zeno 100 is a stylish and practical two-lens magnifier: the main lens with a diameter of 78 mm provides a magnification of 2.5x, and an additional, 19-millimeter gives a magnification equal to 5x. This is very useful when working with typed text of various sizes and images with a large number of details. Thanks to the 5x magnification, you can see much more subtle details of the observed object. Thanks to its lightweight and elegant design, the magnifier attracts attention with its frame-free lens and a chromed, profiled handle that provides a comfortable grip. Technical parameters ∅ total length: 20 cm ∅ Active lens of the main lens: 78 mm ∅ magnification of the main lens: 2.5x ∅ The active diameter of the additional lens: 19 mm ∅ enlargement of the additional lens: 5x ∅ handles: made of aluminum ∅ weight: 140 g Warranty lifetime manufacturer's warranty, 2 years shop warranty
