

Magnet mounting magCLIP for weapons has two strong neodymium magnets lined with a rubber protective layer to prevent scratching the unit. Its assembly and disassembly takes fractions of a second. Installation reliably and reliably deposited on the metal element of the unit, and you need to use more force to photograph it. It can be used for cycling, for the car's body. You do not need any disassembly tools. The magCLIP magnetic holder has a diameter regulation in the range from 23 to 26 mm, it is compatible with all flashlights with a 1" tube, it can be freely combined with such models of Fenix as: TK09, TK10, TK11, TK12, TK15, TK16, TK20, TK21, TK22, TK32, PD35 TAC, PD35,
