

Very bright, practical for many applications National Geographic headlamp with powerful light and range. Equipped with an American LED CREE, it provides a bright white light throughout its lifetime. It is an irreplaceable help wherever you need lighting and free hands: in tourism, climbing, camping, cycling, running, or for various repairs and DIY. Three modes of operation and an adjustable angle of inclination allow you to adjust the flow of light to the current needs and prevailing conditions. Ultralight and waterproof housing protects against rain. The flexible and adjustable headband makes it easy to fit the head. Characteristics and parameter
