The Fenix 16340 battery is a lithium-ion cell with a shocking capacity of 700 mAh and 3.7 V, designed for extremely powerful flashlights. Take advantage of the maximum working time of your device and enjoy the light even longer. Batteries 16340 have a different voltage than CR123 type batteries. Check if your device is suitable for use with batteries. parameters

- battery type: lithium-ion
- capacity: 700 mAh
- voltage: 3.7 V
- symbol: 16340
- no ba
- memory effect
- protection against overheating: YES
- short-circuit protection: YES
- impact resistance: YES
- maximum number of charging cycles: 500
