The compact COMPACT ACTION tripod is the best choice for SLR owners with a set of standard lenses who like to take a lot of photos and videos. The ergonomic head with joystick function and locking mechanism is very intuitive and easy to use. Its convenient grip allows you to smoothly guide the camera and capture great photos with little effort. The innovative, round quick connector is ideal for attaching the camera effortlessly without the need for coins or screwdrivers. Thanks to the optimal shape, fixing the camera will never be a problem. Just close the lever just above the joystick handle. In addition, the adjustment knob together with a round quick connector allows you to perfectly adjust each camera on a tripod, thus increasing its stability. The tripod is equipped with a hybrid type ball head for shooting and filming - the Photo - Movie switch allows you to switch between head modes in seconds, giving you the freedom to take pictures or smooth video shots.
