

Lightweight, compact tripod, the lightest in the Manfrotto family, is located between the mini series and full-size tripods. Compact Light is the lightest tripod in the Manfrotto range. It is ideally designed for any compact camera and thanks to its small size and ultra light weight it is simply made to take it on every trip. The standard 1/4 inch thread and the new knob allow you to attach or unscrew the camera from the head within a few seconds. The built-in ball head with one control lever is ideal for quick positioning of the camera and easy blocking of all movements.
