

MONARCH 7 IL is Nikon's peak achievement in the field of weapon scopes. The image in the field of vision is distinguished by brightness and high contrast. Lenses with multilayer anti-reflective coatings ensure maximum transmission of light. The picture is not only clear and crystal clear, but also well balanced color. Glass-threaded cross-stitch and a robust, one-piece tube with a diameter of 30 mm ensure high durability. Eyepiece with fast focusing is characterized by a large offset of the exit pupil, which allows accurate aiming in the entire zoom range. Adjusting the wind and height correction with the immediate reset function. The cross-hair highlighting can be adjusted in the range of 32 degrees of brightness. Characteristics: 30 mm tube diameter and 4x zoom; a light point with a wide intensity range, with automatic shut-off; Lenses with multilayer anti-reflective coatings; a large diameter eyepiece with convenient removal of the exit pupil; manual correction of the wind and height correction with the immediate zeroing function enabling easy and accurate adjustment of the cross thread; lightweight and robust one-piece main body; etched cross of threads for greater durability; eyepiece with quick focusing of the thread cross; waterproof construction protected against fogging, ensuring the correct operation of the telescope in various conditions; the eyepiece cover can be used to open the battery cover. Technical parameters: model: Nikon Monarch 7 IL 1.5-6x42 BRA15001; magnification (x): 1.5-6; Lens diameter: 42 mm; coatings: multilayer; cross: made of threads, R # etched; Excavation: 7 mm (with 6x magnification); distance between output tube: 96.5 - 94 mm; tube: $\varnothing = 30$ mm, one-piece; Lens diameter: 49.3 mm; external eyepiece diameter: 44 mm; immediate resetting of the knob: yes; adjustment (mm / 1 click) @ 100 m: 7; regulation (MOA / 1 click): 1/4; maximum internal cross thread adjustment (MOA): 156; parallax regulation: from 91.44 m to infinity; field of view: 15° - 3.8° / 26.4 - 6.6 m / 100 m; backlight: yes, 32 degrees of intensity; automatic power off: yes, two hours after the last press of the control button; power supply: CR2032x1; watertightness and protection against evaporation (nitrogen): yes; in the set of lids, sun visor; length: 311 mm; weight: 590 g Warranty 30 years
