

The advanced Monarch 3 weapon spotting scope is equipped with an optical system completely covered with multilayer anti-reflective coatings, considered one of the best on the market. This excellent spotting scope is also equipped with self-aligning scales on the knobs, which makes it possible to quickly and easily adjust the cross of threads in the field. The side parallax adjustment knob ensures optimal shot precision over a wide range of distances. Solid, one-piece, waterproof and fog-protected tubus construction provides excellent results for daily and sport shooting enthusiasts. Characteristics – optical system completely covered with multilayer anti-reflective coatings – interchangeable self-aligning scales on the knobs – precise manual adjustment – eyepiece with quick focusing of the thread cross – large, permanent offset of the pupil's output – neat, comfortable lens covers – solid, one-piece tubus construction – watertightness and anti-fog protection Technical parameters – model: Nikon Monarch 3 5-20x44 BDC – magnification (x): 5-20x – Lens diameter: 44 mm – cross: BDC – Excavation: 2.2 mm (with 20x magnification) – distance of exit pupil: 101.6-91.4 mm – Tube diameter: 25.4 mm – Lens diameter: 52 mm – external eyepiece diameter: 44 mm – one click: 1/8 MOA – adjustment range (height difference and correction for wind): 34 MOA – parallax regulation: from 45.72 m to infinity – field of view: 3.8 ° - 0.95 ° / 6.7 - 1.7 m / 100 m – length: 357 mm – weight: 540 g Warranty 30 years
