

RealHunter ACTIVE headphones are modern active hearing protectors with a built-in control system (active sound damping system). Thanks to it, Real Hunter headphones will automatically block all uniform sounds over 85 dB. This functional solution will allow you to talk freely with colleagues in the fishery or on the shooting range, while maintaining your hearing protection while shooting. RealHunter ACTIVE headphones are equipped with an extremely sensitive directional microphone. Switching on the control system is done by turning the knob located on the side of one of the ear muffs. The same switch adjusts the volume level to suit the prevailing situation. RealHunter headphones have an

ergonomically profiled cushion and an adjustable earflap adjustment system, which increases comfort during use. Earmuffs have been profiled so as to cover the ears completely and adequately protect them from excessive noise. Technical data ∅ NRR * noise reduction factor: 26 dB ∅ cutting off the sounds above: 85 dB ∅ power supply: 2 x AA (not included) ∅ weight: 260 grams (without batteries) * NRR - Noise Reduction Rating - the noise reduction indicator in Poland means the approximate level of noise reduction achieved thanks to the protector, expressed in dB. Warranty 24 months
