

The only such binoculars in the world. It combines a device for daytime observation and a night-time digital night-vision device II. A wide range of magnifications from 4 to 16x and gyroscopic stabilization are unique features. In night conditions, the built-in high-power laser with the possibility of total shutdown and 5-step power adjustment of the backlight make it hide from the user. Binoculars in the night mode allow you to observe the goals away from the user at a distance of 450-500 meters. The binoculars are ideal for travelers, hunters and for lovers of wild nature. Binoculars BinoX-HD 4-16x is a smart solution in HD that will make you throw your old binoculars in the bin. Binoculars BinoX is the most technologically advanced binoculars available in the world! With this binoculars you will gain a preview of the world that has never been possible before. An excellent solution for lovers of spending time outside the four walls. Characteristics
