The ATN Shot Trak camera will allow you to record directly to the SD card everything that is happening in front of the barrel of your weapon. Thanks to optical magnification of 5x and full HD quality (1920x1080), you can capture accurate and detailed images over distances of several dozen meters! ATN Shot Trak can be mounted on any long, short or arch weapon thanks to the 22 mm rail mounting included in the kit. The device is light and compact, and its casing is made of durable composites and resistant to external factors. The Micro SD card slot has support for cards from 2 GB to 32 GB and the largest variant can accommodate up to 420 minutes of MPEG-4 video material. In this version, the ATN Shot Trak X camera is additionally equipped with a functional laser, which will allow for the objective tracking of the target.

Technical parameters

- magnification: 5x
- matrix: 5 MPx CMOS
- resolution: 1920 x 1080, 30 fps (full HD)
- video format: MPEG4
- focus range: from 7 m to infinity
- built-in microphone
- power supply: CR123A
- water resistant: yes
- battery status indicator: yes
- assembly: standard Weaver rail
- dimensions: 66 mm x 33 mm x 46 mm
- weight: 120 g
- Warranty: 24 months
