Fenix HL50 or headlamp, which at the same time is a key torch. It sounds quite unusual, but most of all it is a very practical solution. When we do the work, where the light must fall exactly where we look and additionally the task requires the use of both hands, we put the HL50 flashlight on the belt and the case settled. Otherwise, we attach it to the keys and carry it every day, thus gaining an unchanged vertical EDC flashlight ( every day carry ). HL50 headlight body was made entirely of durable aluminum alloy. Accidental stepping or falling from a height of up to 1 m is not terrible. The HL50 has an IPX-8 water resistance standard, which allows it to be submerged to a depth of up to 2 meters for up to 30 minutes. The lighting power of the Fenix HL50 flashlight is sufficient to illuminate the immediate surroundings, doing all kinds of work, for example, pitching a tent after dark. In high mode, this torch lights up to 170 lumens and up to 365 lumens in momentary mode. Fenix HL50 has 4 modes of lighting (3 continuous and one momentary), which we switch using the button located on the side of the flashlight. Fenix HL50 flashlight in the set has two bodies, the size of which is adapted to two types of power - AA and CR123A. Depending on our needs, we have the option of their replacement.

Shade modes Technical data

- maximum lighting power: 365 lumens
- maximum range: 77 m
- maximum lighting time: 150 hours
- number of modes: 4
- power supply: 1 x CR123 (not included) or 1 x AA (not included)
- water resistance [according to IEC 529]: IPX-8 / 0B 5 (permanent immersion, protection against immersion in water - the equipment is resistant to immersion in the conditions defined by the manufacturer, the product may be subject to penetration after exceeding the depth of the water) recommended by the manufacturer)
- resistance to fall: up to 1 meter

Source of light: Cree XM-L2 (T6) LED lens; ultra clear glass, chemically reinforced, with AR coating
