

# teleskopy.pl

Thanks to the simple extension of the counterweight, we can effectively balance a heavier tube without the need to add (and transport!) Consecutive counterbalance weights.  $\varnothing$  thread on the assembly side: D = 12 mm, male  $\varnothing$  thread at the end of the rod: D = 12 mm, female  $\varnothing$  length: 185 mm  $\varnothing$  Diameter: 18 mm  $\varnothing$  weight: 355 mm
