

Rangefinder Leica CRF 1000 is a pocket laser rangefinder with a range of up to 915 meters. It is characterized by small size, very simple operation, reliability, accuracy of measurement and modern appearance. Rangefinder Rangemaster CRF accurately measures the distance to any object after pressing the key on the upper wall. The top-class optical system, with 7x magnification, facilitates precise tracking of the measuring mark on the target. The measurement result is displayed directly in the device's eyepiece, without the need to detach it from the eye. Thanks to the Leica rangefinder, you know exactly how far away the target is. Knowing the ballistics of your caliber and projectile, you can precisely choose the elevation and thanks to that, give a proper shot. Technical parameters – range from 10 to 915 m – high-quality optics with 7x24 parameters – waterproof up to 1 m immersion – durable carbon fiber construction – easy to use – ergonomic shape – weight around 220g – cover and belt included
