ATN DNVM-2 is a digital night vision monocular for small money - but with great opportunities. It is characterized by a good amplification and clarity of the image. In addition, the user can manually adjust the brightness of the display for optimal image quality. When it's too dark, just turn on the built-in IR illuminator, allowing you to observe even in total darkness. At the back of the night vision device there is a TV-out output allowing observation on the external screen. A perfect night device for nature observation, camping or yacht. Digital night vision - can be used during the day, at dusk, at dawn, and of course - at night. Technical parameters ∅ magnification: 2x ∅ ∅ Lens diameter: 24 mm ∅ angled field of view: 15 ° ∅ focusing range: from 0.9 m to infinity ∅ tuning range for the eye defect: +/- 5 D ∅ brightness adjustment: manual ∅ technology: Ultra Bright Technology ∅ color display: yes ∅ resistant to moisture, mist and splash ∅ operating temperature range: -30 ° C to 60 ° C ∅ TV output: yes ∅ power supply: 1 x 3V CR123A, included ∅ dimensions: 175 x 75 x 64 mm ∅ weight: 450 g Warranty 2 years (the pictures below show a version with 4x magnification)
