Delta Optical EntryDot is the newest collimator on the market. Small size, closed optical sight produced by Delta Optical, thanks to the precision of workmanship guarantees the reliability and accuracy of shots and full overview of the foreground. The diameter of the 2-D aiming point is a perfectly matched dimension recommended by experienced shooters. It is possible to buy 6-14 mm adjustable mounting for EntryDot. The intensity adjustment knob gives you the ability to adjust the brightness of the aiming point in a step of eleven steps. Battery replacement is trouble free and instant. The collimator is surprisingly easy to assemble and shoot. Thanks to the closed structure, it is resistant to water and snow. The optical device is equipped with a 22 mm Weaver rail assembly, it is possible to unscrew the mounted mounting base quickly and easily and to replace it. A big advantage of the EntryDot collimator is its weight of only 140 g. Stamina up to 4000 J. Parallax error corrected at a distance of 50 m. Delta Optical EntryDOT collimator - the most important features: â€¢ closed construction, intended for binocular aiming â€¢ manual adjustment of the lighting using the knob on the right side of the device â€¢ 11 levels of brightness of the sight point â€¢ unlimited field of view â€¢ easy battery replacement â€¢ precise adjustment of the position of the sight point â€¢ simple assembly and disassembly â€¢ weight 140 g. Technical parameters â€¢ closed construction, intended for binocular aiming â€¢ manual adjustment of the lighting using the knob on the right side of the device â€¢ 11 levels of brightness of the sight point â€¢ Lens diameter: 20mm â€¢ weight: 140 g â€¢ device length: 71mm Equipment included â€¢ collimator â€¢ detachable mounting base for Weaver rail â€¢ CR2032 3V battery Warranty 2 years
