Thanks to the Levenhuk Zeno Vizor H2 head loup, both hands remain free, making it easier to work on small objects. The magnifier is equipped with LED lighting and has interchangeable lenses with different magnifications. It is securely mounted on the head with a comfortable and flexible strap. The magnification range is from 1.5x to 8x. The magnifier is fixed on the head by means of a special strap with adjustable length. It is equipped with LEDs to illuminate the work area. The backlight can be switched on and off using the switch on the magnifier body. You can choose one of the four zoom levels available. You can change the zoom magnification by replacing the main lens or by rotating the rotation lens for the right eye. All optical elements are made of special optical plastic and provide a sharp and clear image throughout the field of view. Technical parameters ∅ magnification: 1.5x / 3x / 6.5x / 8x ∅ head magnifier ∅ built-in LED backlight (2 white LEDs) ∅ optical material: plastic ∅ housing: plastic ∅ applications: sewing, reading, repair of watches / jewelry ∅ weight: 280 g Warranty 2 years
