The Levenhuk Zeno Vizor H1 head magnifier is a compact and portable magnifier that provides four levels of magnification. The kit includes interchangeable lenses made of high-quality optical plastic; a special rotating lens for the right eye is attached. The magnification range is from 1.5x to 8x. It's very easy to put a magnifying glass over your head thanks to the elastic Velcro strap. Your hands will be free, which will allow you to do all kinds of work on small items. For greater convenience, the magnifier is equipped with LED lighting - two bright LEDs are located on the sides of the lens. The intensity of light is enough to work in complete darkness. The backlight is powered by AAA batteries (not included). The Levenhuk Zeno Vizor H1 headlamp is designed for both home and professional use. Jewellery, soldering, repairing watches, embroidery, reading and other activities related to small items will be easier and more enjoyable with the Levenhuk Zeno Vizor H1 headlamp!
