Levenhuk Zeno Vizor N2 Neck Magnifier is equipped with a neck strap and tripod. The large diameter of the main lens allows you to observe a large area and work on several small objects at the same time. This magnifier is very useful both at work and at home. Reading small letters, embroidering, viewing small images, working on small parts - everything becomes easier and more convenient with the magnifying glass on the neck Levenhuk Zeno Vizor N2. This magnifying glass model is ideal for work requiring high precision and accuracy. The main lens has a magnification of 2.5x, and the additional lens - 5x. The Levenhuk Zeno Vizor N2 magnifier has a built-in LED backlight that allows you to work even in low artificial and natural light. When using a tripod, you can have both hands free when you need to do a more complex job. Technical parameters
