The telescopic arm Removu 160 is an adjustable arm designed for cameras with GoPro mount and with a 1/4 inch photo mount (including cameras). It is characterized by excellent workmanship and good rigidity also for the last section of the monopod. The monopod can be turned into individual sections for cleaning with sand or dust and rinsing after contact with salt water. Technical parameters

- mounts: "GoPro" feet and 1/4 inch (photo)
- head: tilting
- material: aluminum + plastic
- number of sections: 4
- leash on the wrist: yes
- length (min / max): 51 cm / 160 cm
- weight approx. 185 g / about 290 g in the original packaging
