

Fenix ARB-L18-2900 is a high quality 18650 cell, recommended for Fenix touring and tactical flashlights (PD and TK series). A battery designed for use with intensively used flashlights. It is characterized by high capacity, reliability and unique design. The link has triple protection against overheating and protection against too high voltage and against voltage drop. parameters battery type: lithium-ion ARB-L18 18650 capacity: 2900 mAh voltage: 3.7 V symbol; 18650 charging current: recommended 1 A, maximum 2 A dimensions: 68 mm x 18.5 mm (hx ?) weight: 50 g
