

The Levenhuk Rainbow series of binoculars is an extraordinary range of high quality binoculars for hiking. Each model comes with a convenient carrying case for storing and transporting the device, a neck strap and a cleaning cloth. Attractive and modern packaging perfectly emphasizes the stylish look of binoculars. Binoculars from the Levenhuk Rainbow series are equipped with a high-quality optical system made of BaK-4 optical glass. This material is characterized by a high refractive index, thanks to which the generated image is clear and sharp. Prisms and lenses are coated with an anti-reflection coating that provides greater contrast and high color intensity of the observed image.
