

Apolird 12-36x50 HD Riflescope is an optically excellent, mechanically perfect, compact refractor to observe nature, birds, very good for observing sport competitions (handheld at 12x magnification), perfect for target shooting (observation of the target at distances of 25 and 50 Eyepiece set at 45 ° (Amici prism). The telescope is included with the cover and table stand, thanks to which the device put on the hood of the car, the window sill, the shooting table - it takes up little space and gives the possibility of observation with good stability. The telescope can be placed on any tripod with a standard screw fixing 1/4 inch. Characteristics

- waterproof, filled with nitrogen
- low-dispersion elements in the lens improve image quality
- retractable eyecup
- retractable ring / sun visor on the front of the lens
- swivel tripod mount
- precise focusing knob

Technical parameters

- Zoom: smoothly variable, 12-36 times
- Diameter of the lens: 50 mm
- Optical system: achromatic refractor
- Anti-reflective layers: MC
- Field of view: 2.1 ° - 1.2 °
- Minimum distance of observation: 7.5 m
- Retracting the output pupil: 18 mm
- Outer diameter from the lens side: 70 mm
- Outer diameter from the side of the eyepiece: 44 mm
- Height: 150 mm
- Length: 270 mm (including eyepiece, 220 mm without eyepiece)
- Weight: approx. 660 g (990 g complete with tripod and cover)
