The MEP-20-60 is a versatile three-zoom eyepiece designed for MONARCH monoculars. Effective chromatic aberration correction ensures high resolution and sharpness of the whole image in the full zoom range. Thanks to the large offset of the exit pupil, the field of vision is clear even for those who wear glasses, while the rotating and sliding rubber eyecups facilitate the proper fitting of the binoculars to the eyes. The magnification range is 20-60x when mounted on the MONARCH 82 and 16-48x scope monocular when the MONARCH 60 Series telescope is attached.

Technical parameters

- magnification: 16-48x (60mm) / 20-60x (82mm)
- angular field of view: 2.6 - 1.2 ° (60 mm) / 2.1 - 1.0 ° (82 mm)
- Linear field of view (@ 1000 m): 45 - 21 (60 mm) / 37 - 17 m (82 mm)
- shadow removal: 16.1 - 15.3 mm
- watertightness: non-watertight eyepiece; after mounting on the telescope: waterproof (equivalent to 5 mm per minute water for 30 minutes)
- dimensions: 89 mm (body itself, length) x ? = 62 mm
- weight: 350 g
