

Two-channel Newell Dual charger enables fast and safe charging of two AABAT-01 batteries dedicated for GoPro Hero 5 Black sports cameras. The device is characterized by a compact design and small size. Thanks to the possibility of powering from any USB port (2 A) the charger will work perfectly during travel. Next to the micro USB port, the device also has an increasingly popular USB Type C interface. The charging process is controlled by an integrated circuit that protects the batteries from overheating and overcharging. After charging the batteries, the charger stops charging and goes into standby mode. Thanks to this, there is no fear that the cells left in the charger for a long time will be damaged. The diode indicates the current state of the device - it lights red in charging. The end of charging signals the LED's color changed to green. The charger is compatible with system GoPro batteries, Newell batteries and other substitutes. Technical parameters  $\hat{\text{€}}$  power supply: 5 V; min. 2.1 A  $\hat{\text{€}}$  charging current: 2x 4.4 V; 750 mA  $\hat{\text{€}}$  dimensions: 4.5 x 6 x 2 cm  $\hat{\text{€}}$  compatibility: AABAT-01 batteries dedicated to GoPro Hero 5 Black cameras  $\hat{\text{€}}$  included: charger, USB power cable **Warranty 24 months**
