The Camrock FastStrap CS40 reporter belt is a solution for those who are looking for a convenient and safe alternative to the neck strap that comes standard with the camera. The carrying system of Camrock FastStrap straps has been designed to minimize the time needed to reach for the camera and take a picture. The camera hung on the reporter's strap is close to the hand, and the movement needed to lift it to the eye is natural and fluid. Transferring the load from the neck to the shoulder also improves the comfort of many hours of using the device, eliminating neck pain. The belt of the belt made of nylon with a high density of weave guarantees the safety of the suspended equipment. Its adjustable length allows you to quickly adapt to your preferences. The shoulder part of the strap has been profiled with comfort in mind and made of a pleasant to the touch material that prevents the clothes from slipping. The CS40 is additionally equipped with an arm belt fastened under the arm, keeping the whole body firmly in place. Camera movement on the belt can be locked in the selected position using two stops. Camrock FastStrap allows fast detaching and attaching the camera to the strap using a metal carabiner and mounting screw (screwed into the camera stand mount).
