360fly 4K camera allows you to save the most important moments that you experience in 360 degrees and a great 4k resolution. From now on, no precious moment will be left out. The device has such a wide field of view that it records everything around you, so you do not have to worry about the omitted frame during recording (eg POV cameras). In short, your movie is 360 ° x 240 °. Ideally works with VR (virtual reality) glasses. See necessarily: 360 ° videos from 360Fly cameras : <https://360fly.com/videos/> Technical parameters • maximum resolution: 4K 2880 x 2880 (30 fps) • filming modes: 360 ° and POV (from the user's perspective) • field of view in POV mode: 190 ° • optics: 8-element "fish-eye", F / 2,5, f = 0.88 mm, sharpness from 30 cm • weight: 172 g • has an internal memory of 64 GB • waterproof up to 1 meter, dust- and shockproof • built-in 1780 mAh battery (about 1.5 hours of work) • has a built-in gyroscope, GPS, accelerometer, compass • communication: Wi-Fi [802.11b / g / n], Bluetooth 4.0 • the official website - www.360fly.com • iOS application for free download - enter "360fly" in the App store and download • Android application - enter "360fly" on Google Play and download • computer program - Desktop Director
