

teleskopy.pl

There are several parameters that determine the quality of the recording, and one of the leading (next to the framing and stabilization) is lighting. The "Luminous Cube" Lume Cube is a universal solution to the problem of ambient lighting, especially where normal studio lighting is not possible (under water, during filming, drone, etc.). Lume Cube 2 Pack - two cubes with a 1/4 inch mount on the bottom of the housing, in a set with a USB charging cable. Housing color: black

The main features of the Lume Cube

- super durable housing
- brightness of 1500 lumens
- waterproof up to 30 meters
- control manually or through the application in the phone

Parameters and features

- cube with side 1.5" / 3.8 cm with very durable housing
- 150 lux on 3 meters
- from 1 to 1500 lumens
