

teleskopy.pl

Dob Dolly - a trolley for moving telescopes. Thanks to it, without fatigue and with smaller shocks, you can move the telescope to the observation place. Intended, among others for all Dobson Orion telescopes from 4.5", through 6", 8" to 10". The use of Dob Dolly reduces the probability of collimating the telescope. The trolley is also compatible with the Dob Pod - Dobson base of Orion. Characteristics

- has rubber feet that absorb vibrations
- compatible with Orion Dob Pod
- has leveling feet and a stabilizing trolley (no need to remove the telescope from the trolley for the time of observation)
- it is not recommended for driving on difficult terrain

List of compatible telescopes

- Orion SkyQuest XT4.5 Classic Dobsonian Reflector Telescope
- Orion SkyQuest XT6 Classic Dobsonian Reflector Telescope
- Orion SkyQuest XT8 Classic Dobsonian Reflector Telescope
- Limited Edition Orion SkyQuest XT8 Classic Dobsonian Reflector Telescope
- Orion SkyQuest XT8 PLUS Dobsonian Reflector Telescope
- Orion SkyQuest XT10 Classic Dobsonian Reflector Telescope
- Orion SkyQuest IntelliScope XT6i Dobsonian Reflector Telescope
- Orion SkyQuest IntelliScope XT8i Dobsonian Reflector Telescope
- Orion SkyQuest IntelliScope XT10i Dobsonian Reflector Telescope
- Orion SkyQuest XT8g GoTo Dobsonian Reflector Telescope
- Orion SkyQuest XT10g GoTo Dobsonian Reflector Telescope

Warranty 12 months
