

teleskopy.pl

The holster has been made of the highest quality organic skin. It has a soft bedding and magnetic closing so that the camera is even better suited. For full protection of the camera together with the case we get a protective lens cover with a UV filter, which was made of Japanese ACG glass that increases the sharpness of the image. The case gives access to the YI 4K camera touch screen Note: black producer's photos for the white version:
