---

The Celestron Land & Sky 60 telescope allows terrestrial observations with 35 and 175x magnification, as well as the first steps in observations of the Moon and planets. The lens diameter is 60 mm and the focal length is 700 mm.

Includes 90 degree angle connector. You do not need any tools to start the observation. Aluminum tripod included.

Technical parameters

- Optical system: refractor (achromatic doublet)
- Lens diameter: 60 mm
- Focal length of the lens: 700 mm
- Magnification in the set: 35x and 175x
- Maximum useful magnification: 120x (in astronomy)

- Eyeglass extractor: 0.965 "/ 24.5 mm
- Finder: 3x20
- Mounting type: azimuthal, aluminum
- Length: 90 cm

Usage: Moon the planet star clusters nebulae scenery Warranty 2 years
