The Vortex GlassPak binocular case protects the binoculars against the weather and protects it against mechanical damage, at the same time making it easier to carry. Additional pockets allow you to carry additional equipment, such as decoys, a notebook and a pen. The case has been equipped with a harness system that creates a "harness". This allows you to keep the case close to the torso, which significantly reduces the risk of damage to the binoculars transferred in this way. Product features    dimensions: 171 × 159 × 95 mm    weight: 227 g
